Series MAX3
Compact Magnetic Absolute Linear Encoder

- Absolute measurement for increased safety (resolution 1 mm)
- Ideally suited for mobile automation applications
- Measuring lengths of up to 2450 mm possible
- Insensitive to dust, dirt and water
- Contactless, wear-free measuring principle
- Position detection even in de-energized state
- Only one time definition of the Min and Max position
- No further calibration or referencing required
- Automatic distance detection (LED lights up red if the distance between sensor and magnetic tape is too large)
- Quick and easy installation
General:

MAX3 is a magnetic absolute length measuring system designed for measuring lengths up to 2450 mm. Thanks to its compact design, the non-contact and wear-free measuring principle as well as its high IP65 protection class (optionally IP69K), the measuring system is particularly suitable for use in harsh environments (e.g. mobile automation).

The sensors and the necessary evaluation electronics are integrated in a compact metal housing, which converts the scanned signals into the desired interface format. By using the supplied adhesive tape, the absolutely coded magnetic tape is glued onto a flat surface. The maximum allowed mounting distance between sensor and magnetic tape is 1.5 mm. Further tolerances can be found on the last page.

Advantages:

A major advantage of the MAX3 is its compact design, which makes it equally suitable for retrofitting as well as new installations in existing machines and vehicles.

Due to the absolute measuring principle, no further referencing is required after the minimum and maximum positions have been defined once.

The absolute Measuring Principle:

The absolute measuring principle ensures maximum safety, as the current position value is always present. Even in the event of a power failure, no data is lost.

The functional Principle:

A Hall sensor line is guided over a coded magnetic tape which is written with an absolute track and always provides the current absolute position. The sensor system scans the code sequence of the north and south poles and determines the absolute value with a resolution of 1 mm. Usable magnetic tapes are the 10 mm wide variant AB20-21-10-R-D-10 or the 20 mm wide AB20-21-20-1-R-D-10.

Available Output Interfaces:

- Interface option I20 → Analog 12 bit output signal (0 ... 20 mA), proportional to the measured value
- Interface option I24 → Analog 12 bit output signal (4 ... 20 mA), proportional to the measured value
- Interface option V04 → Analog 12 bit output signal (0.5 ... 4.5 V), proportional to the measured value
- Interface option V10 → Analog 12 bit output signal (0 ... 10 V), proportional to the measured value
- Interface option CA0 → CANopen standard interface according to DS406 (encoder profile)

Installation / Alignment:

10 mm wide tape:  
Mounting direction = counting direction

20 mm wide tape:  
Mounting direction = counting direction
### Technical Data:

**Mechanical data:**

- **Measuring principle**: absolut
- **Repeat accuracy**: ±1 increment
- **System accuracy**: ±1 mm at max. 2450 mm measuring length (standard)
- **Distance sensor - tape**: max. 1.5 mm
- **Measuring length**: max. 2450 mm
- **Housing material**: galvanized aluminium
- **Dimensions**: L x W x H = 52 x 16 x 30 mm
- **Magnetic tape types**: AB20-21-10-1-R-D-10 (10 mm) or AB20-21-20-1-R-D-10 (20 mm)
- **Basic pole pitch**: 2,1 mm
- **Sensor cable length**: standard: 1.5 m (others on request)
- **Weight (without cable)**: approx. 50 g; cable approx. 60 g/m

**Electrical data:**

- **Power supply voltage**: 10 … 30 VDC
- **Residual ripple**: 10 … 30 VDC <10 %
- **Current consumption**: max. 80 mA
- **Available interfaces**: CANopen standard (DS406)
  - 12 bit analog output (0 … 20 mA)
  - 12 bit analog output (4 … 20 mA)
  - 12 bit analog output (0.5 … 4.5 V)
  - 12 bit analog output (0 … 10 V)
  - SSI (binary or Gray) on request

**Connections standard:** open cable ends

**Resolution**: 1 mm

**Operating speed**: max. 2.0 m/s

**Environmental conditions:**

- **Storage temperature**: −25 … +85° C
- **Operating temperature**: −25 … +85° C
- **Humidity**: max. 95 %, non-condensing
- **Protection class**: standard: IP65 / optionally: IP69K

**Connections (Standard):**

- **Open cable ends:**

### Type Designation:

- **MAX3**
  - AABBCCCCDDDF FFGHIJ

- **A**
  - **Version**
    - 00 = ELGO standard version
    - 01 = first special version (etc.)

- **B**
  - **Signal Cable Length (in dm)**
    - 015 = 15 dm (≈1.5 m) standard length
    - (others on request)

- **C**
  - **Resolution (in µm)**
    - 1000 = 1000 µm (≈1 mm)

- **D**
  - **Interface**
    - I2O = 12 bit analog output (0 … 20 mA)
    - I24 = 12 bit analog output (4 … 20 mA)
    - V04 = 12 bit analog output (0.5 … 4.5 V)
    - V10 = 12 bit analog output (0 … 10 V)
    - CA0 = CANopen interface (DS406 encoder profile)
    - SBO = SSI interface, 25 bit binary code (on request)
    - SG0 = SSI interface, 25 bit Gray code (on request)

- **F**
  - **Bit Rate** (only for CANopen interface)
    - 125k = 125000 bit/s
    - 250k = 250000 bit/s
    - 500k = 500000 bit/s
    - 1MHz = 1000000 bit/s

### Additional Options

- **G**
  - **Address** = CAN device address 0 … F (standard = 0)

- **H**
  - **Connections**
    - - - - = open cable ends (standard)
    - R5M0 = 5-pin (male) M12 round connector

- **I**
  - **A** = CANopen without internal termination resistor

- **J**
  - **H** = IP69K (Heavy Duty) instead of IP65 (standard)

**Order example:**

MAX3000151000CAO250kFR5M0A- AABBBBBCCCCCCDDDF FFGHHHHHHH

ELGO standard MAX3 with 1.5 m long cable, 1 mm resolution, CAN interface with 250 kb bit rate and device address F, connections via 5-pin M12 round connector, CAN without termination resistor
**MAX3**

### Mounting Tolerances:

**Reading distance:**

- **Pitch angle:**
  - \( \pm 1.0 \) mm
  - max. 1.5 mm

**Yaw angle:**

\( \leq \pm 1.0 \) °

**Lateral offset (10 mm tape):**

- \( \pm 1.0 \) mm
- Sensor pitch line center

**Lateral angle (10 mm tape):**

- max. 1.5 mm

**Lateral offset (20 mm tape):**

- \( \pm 2.0 \) mm
- Sensor center = tape center

**Lateral angle (20 mm tape):**

- max. 1.5 mm

### MAX3 Accessories:
